SUMMARY

 Built multiple full-stack applications using Django REST & React with authentication and database design. Passionate about shipping production-ready backend systems.

TECHNICAL SKILLS

Languages: Python, JavaScript
Backend: Django, Django REST Framework, REST APIs
Frontend: HTML5, CSS3, JavaScript (ES6+), React , Tailwindcss
Databases: MySQL,Postgres
Tools & Concepts: Git, GitHub, JWT, Postman, Docker

PROJECTS

Job Portal Application (Django + React)

- Developed RESTful APIs using Django REST Framework for job listings and applications with CRUD operations and authentication.
- Implemented role-based authentication for employers and job seekers.
- Integrated **React** frontend with Django APIs for dynamic UI.
- Designed and managed relational database using **SQLite**.
   Tech: Python, Django, DRF, React, TailwindCSS

Hotel Menu Management System (Django)

- Developed a **restaurant menu management web application** using **Python and Django** with category-wise menu listing.
- Implemented **admin-controlled CRUD operations** for managing menu items and availability using **Django Admin**.
- Designed and integrated **SQLite database** with responsive UI using **HTML and CSS**..
   Tech: Python, Django, SQLite, HTML, CSS

EDUCATION

- **M.Sc. Chemistry** – Monark University
- **B.Sc. Chemistry** – Gujarat University
